

Air Transport of Radioactive Materials Training

Course Description

This course is directed solely towards the transportation requirements for the shipping of radioactive materials by the International Air Transport Association (IATA) Dangerous Good Regulations (DGR). The presentation assumes knowledge of domestic regulations for radioactive materials and concentrates on the differences.

Materials Provided

Each participant receives a current edition of IATA DGRs, student manual, course exercises, and other supplemental classroom supplies and handouts.

Examination

A separate open-book exam is available for this training. A certificate will be issued for those who successfully complete with a passing score of 80% or better.

Record Keeping

Original tests and certificates will be returned to individuals for on-site record keeping.

Who Should Attend?

Employees required to certify that shipments of radioactive materials are in compliance with DOT's 49 CFR and the IATA Dangerous Goods Regulations for domestic air and international transport.

Course Duration

8 hours

Retrain Frequency

2 years

Course Topics

- Classification
- Proper Shipping Names
- Packaging
- Radiation-Contamination Limits
- Marking and Labeling
- Documentation
- Variations
- Limitations
- Shipping Exercises

Prerequisites

NRC/DOT Radioactive Waste Packaging, Transportation and Disposal Training (Commercial)

NRC/DOT Experienced Radioactive Waste Shipper Refresher Training (Commercial)

Advanced Radioactive Material Shipper Certification (DOE)

Equivalencies must be approved by EnergySolutions Training Manager.
