

Reconnecting

Newsletter for our Commercial Nuclear Plant Clients
March 2022 • Issue 01

INSIDE

Reconnecting

Reengaging face-to-face with our valuable customers

Client Service Program

Addressing near- and long-term waste management objectives

Future Issues

Capability updates and innovative solutions

We have all been through a challenging couple of years with impacts to our everyday life. One of the changes that hurt the most was our inability to safely travel and connect with you face-to-face. **We are ready to move forward and reconnect face-to-face with our valued customers. A key theme for our 2022 efforts is reinforcing to our commercial nuclear operating clients our commitment to support your long-term sustainability.** Our team is highly focused on making sure we leverage our full range of nuclear waste dispositioning capabilities to deliver your operations with global solutions that are cost effective, environmentally safe, and regulatory compliant.

Client Service Program

As step one of our 2022 Client Service Program, you will receive a routine newsletter from your Account Executive geared to provide you with informative updates on each of our global waste solutions service lines. The newsletter schedule and EnergySolutions core service updates for the balance of the year are outlined on this page.

You will also be hearing from your Customer Service team in the near future to set up a meeting face-to-face or via Teams to get fully reengaged with your team and make sure we are aligned with your 2022 radwaste management plan and target objectives.

We value our long-term relationship with your organization. We look forward to continuing to work cooperatively with your radwaste team to leverage our global waste dispositioning capabilities to help achieve your 2022 and beyond goals and objectives.
