

WHERE COMPLEX CHALLENGES
MEET SMART SOLUTIONS

MHF  **SERVICES**

AN **ENERGYSOLUTIONS** COMPANY

SMART SOLUTIONS

- ▶ DIRECT RAIL TRANSPORT
- ▶ MULTIMODAL SYSTEMS COMBINE INTERMODAL, RAIL, TRUCK, AND MARINE CONVEYANCES
- ▶ SPECIALTY EQUIPMENT TO TRANSPORT RADIOACTIVE, HAZARDOUS, AND INDUSTRIAL MATERIALS
- ▶ OVERWEIGHT AND OVERSIZE SHIPMENTS

TRANSLOADS

MHF Services has five permanent transload facilities and can quickly establish a temporary transload site, enabling us to offer a safe and secure method of transferring our customers' bulk or packaged materials between truck, rail, and marine conveyance systems. This means that rail transport can be used for projects where the origin or destination is not rail served, allowing customers to benefit from improved safety, security, and cost efficiencies. All of our facilities are compliant with applicable regulations and are staffed by some of the most competent, experienced transportation managers in the business.

PACKAGING

MHF Services is a leading provider of flexible and durable packaging products for a wide range of industrial and environmental applications. We work closely with our customers to understand their specific packaging requirements and recommend the best solutions for individual project requirements. As experts in transportation logistics, MHF combines our knowledge of packaging and transportation to offer the most cost-effective, safe, and compliant solutions. MHF-packaging systems are supplied under a stringent Quality Assurance Program and are compliant with applicable federal regulations.

TECHNICAL SERVICES

The MHF team comprises the nation's premiere group of waste transportation, logistics, packaging, and disposal management experts. Its personnel have extensive experience managing large volumes of waste from point of origin to disposal for DOE, USACE, and EPA—as well as commercial clients. MHF's professional technical services are an integral part of the total MHF Services' solution package. We can support projects with on-site, dedicated staff for logistics coordination, waste management services, and shipping documentation preparation.

DISPOSITION

MHF Services can assist our customers with determining the best method for dispositioning low-level radioactive waste (LLRW). MHF's technical experts can evaluate all disposition options including bulk survey for release, volume reduction, decontamination for release, and direct disposal. In addition to evaluating disposition needs, MHF offers standard and custom-designed packaging options and complete transportation services to ensure our customers' LLRW materials arrive safely at the selected disposition facility.
