

Environmental Management Policy

EnergySolutions, LLC (ES) is committed to being a world leader in radioactive material and hazardous waste recycling and disposal, radioactive waste management, and decommissioning services that includes a strong environmental commitment which extends beyond mere compliance. We are stewards of the environment and recognize that conserving our resources is essential for sustainable human-environment interaction. Protecting and improving the environment is a core value that informs our operational philosophy, leading to successful outcomes for our business, community and clients.

Our operations, products, and services will be guided by an Environmental Quality Management System which foster the following principles:

- **Safe Management:** We prioritize the safe handling and reduction of radioactive and hazardous waste, focusing on reuse and recycle whenever possible;
- **Regulatory Excellence:** We aim to meet or exceed all relevant regulations, contractual obligations, and standards that promote environmental sustainability;
- **Quality Impact:** We deliver services and products that positively contribute to addressing climate change;
- **Worker Safety:** Management and staff engage in identifying worksite hazards, ensuring that environmental, industrial, radioactive, and chemical risks are managed to minimize the likelihood of worker safety incidents;
- **Continuous Improvement:** We embrace a culture of continuous improvement to enhance our environmental compliance through corrective actions, shared lessons, internal assessments, training, technology innovations, teamwork, and open communication;
- **Community Benefits:** We develop environmental management strategies that benefit the community and stakeholders by finding innovative solutions to environmental challenges; and
- **Culture of Innovation:** We actively foster a culture of innovation, participation, and ethical management practices at all organizational levels.
